

Ryan Flynn

Software Engineer

WORK EXPERIENCE

Altimetrik

Associate Engineer

October 2024 – Present

Product and Platform Engineering

- Working as a Software Engineer on Galileo's payments infrastructure, powering digital banking services for fintech clients.
- Contributing to the modernization of legacy payment processing workflows, improving maintainability and code quality.
- Implementing card network mandates and compliance updates from Mastercard and Visa.
- Investigating and resolving client-reported issues related to payment processing, account activity, and transaction failures.
- Parsing and troubleshooting ISO 8583 messages to support accurate and reliable transaction processing.
- Using Splunk and Datadog to monitor application logs, trace errors, and troubleshoot production issues.
- Contributing to release planning and rollout strategy by managing feature flags across multiple environments.

SOLUTE, a Sigma Defense Company

Software Engineer II

August 2021 – October 2024

- Contributed to the backend of a Navy planning web app built with Python and React, handling data validation with Pydantic and managing PostgreSQL databases.
- Integrated an internal tool into the application, significantly reducing user effort and improving efficiency.
- Authored backend documentation for calculations and algorithms to support user help resources.
- Improved CI/CD pipelines with GitLab, implemented infrastructure as code using Terraform, and participated in agile sprints with active involvement in code reviews and testing.
- Promoted from **Software Engineer I** (November 2022)

Cuhaci & Peterson Architects

Computational Design Programmer

January 2021 – August 2021

- Developed Python scripts to automate Revit model creation, significantly improving efficiency for architects at the firm.
- Collaborated with fellow employees to develop process-based automation tools aimed at improving workflow.
- Led Computational Design efforts as the sole programmer in collaboration with my supervisor, driving innovation within the company.
- Promoted from **Computer Programmer Intern** (March 2021)

PROJECTS

Portfolio - JavaScript, React, Tailwindcss

Savings Mapper - Swift, SwiftUI, XCode

Pet Connect - Python, Java, Firebase, Raspberry Pi

SKILLS

Languages:

- Python
- Swift
- Java
- JavaScript
- Rust
- Golang

Frameworks:

- Pydantic
- Pytest
- SwiftUI
- ReactJS

Databases:

- Oracle
- PostgreSQL
- Google Firebase

DevOps:

- GitLab CI/CD
- Helm
- Terraform
- Docker

IDEs:

- Visual Studio Code
- Xcode
- Android Studio

Additional Technologies:

- Claude Code
- Postman
- Splunk
- Datadog
- Swagger

EDUCATION

University of Central Florida

B.S. Computer Engineering

Minor in Psychology

Orlando, FL — December 2020

OTHER

CompTIA Security+ Certification

• December 2021
